## **Scientific Program**

Monday April 04, 2022

#### 5<sup>th</sup> Online International Conference on

# Catalysis and Chemical Engineering (Scopus Indexed)

	Day 1 - April 04, 2022	
10:00 - 10:10	Introduction	
Plenary Presentation		
10:10 - 10:50	Identification Of Solids For True Design And Precise Characterization Of Functional Materials Bunsho Ohtani, Bu Hokkaido University, Japan	
Oral Presentations		
10:50 - 11:10	Eco-Friendly Synthesis Of Metallic Bismuth Nanoparticles Marc Port, HESAM University, France	
11:10 - 11:30	Screening of Commercial Fined Plate-Tube Heat Exchangers for Adsorption Heat Transformation Alexandra Grekova, Boreskov Institute of Catalysis SB RAS, Russia	
11:30 - 11:50	Transition Metal Complexes (Fe, Cu, Co) With Semi-, Thiosemi - And S-Methl - Isothiosemicarbazone Ligand Systems As Potential Electrocatalysts For Hydrogen Evolution Raction Violeta Jevtovic, University of Hail, Kingdom of Saudi Arabia	
11:50 - 12:10	Semisynthesis Of Rumphellaones A-C And Rumphellolide J From Caryophyllene Rasina Dace, Latvian Institute of Organic Synthesis, Latvia	
12:10 - 12:30	Enantiopure Construction Of Small-Molecules Of Drug-Likeness From Naturally Occurring Non-Racemic 2-Hydroxycitric Acid Lactones Chithra Mohan, Mahatma Gandhi University, India	
Lunch: 12:30 - 13:00		
13:00 - 13:20	Green Synthesis Of Nano Composites For Radioactive And Toxic Ion Binding Ugis Eismonts, University of Latvia, Latvia	
13:20 - 13:40	The Abatement Of Dye From Real-Time Textile Dyeing Effluent Using Electrochemically Generated Cu(OH) <sub>2</sub> /Cuo As Coagulants In Electrocoagulation Parameswari Kalivel, Karunya Institute of Technology and Sciences, India	
13:40 - 14:00	Smart Hybrid Self-Sensing Nano-Composite Concrete Embedded Sensors For Structural Health Monitoring Applications Anand M.Hunashyal, KLE Technological University, India	
14:00 - 14:20	Information Shuttling by shuttling of electron – A Novel Electrochemical/DFT Approach Saba Rauf, Jinnah University for Women, Pakistan	
	Day 1 Concludes	

#### **Scientific Program**

Tuesday April 05, 2022

## 5<sup>th</sup> Online International Conference on

# Catalysis and Chemical Engineering (Scopus Indexed)

10:00 - 10:30  Optimization Of Engine Operating Parameters Using Hybrid-Numerical Model Sathyanatayanan. S, Saranathan College of Engineering, India  Chemical Factors And Lattice Reactions Governing Thermoelasticity And Superelasticity In Shape Memory Alloys Osman Adiguzel, Firat University, Turkey  Oral Presentations  Investigation On Mechanical Properties Of A Livestock Waste (Valle Del Belice' Sheep Wool) As Reinforcement In Earthen Building Components Monica Parlato, University of Catania, Italy  Biodifferentiation And Biosynthesis Of Zinc Oxide Nanoparticles Using Olive Mill Wastewater And Music Sounds Selma Hamimed, University of Carthage, Tunisia  Microwave Assisted Spectrophotometric Determination Of Cefaclor In Pure Form And Pharmaceutical Formulation Amina Mumtaz, PCSIR Labs Complex, Pakistan  12:00 - 12:20 Partoev Kurbonali, National Academy of Sciences, Tajikistan  Synthesis Of Surface Engineered Zinc Ferrite (ZnFe <sub>2</sub> O <sub>4</sub> ) Nanoparticles By Coprecipitation Method And Their Characterization Atta Ur Rahman, Jiangsu University of Science and Technology, China  Green synthesis of a novel porous gold-curcumin nanocomposite for efficient alcohol oxidation Sai Prasad Nayak, Sri Sathya Sai Institute of Higher Learning, India  Poster Presentation  Docking And Molecular Dynamics To Predict The Binding Modes Of Flavonoid With		Keynote Presentations	
10:30 - 10:30  Sathyanatayanan. S, Saranathan College of Engineering, India  Chemical Factors And Lattice Reactions Governing Thermoelasticity And Superelasticity In Shape Memory Alloys Osman Adiguzel, Firat University, Turkey  Oral Presentations  Investigation On Mechanical Properties Of A Livestock Waste (Valle Del Belice' Sheep Wool) As Reinforcement In Earthen Building Components Monica Parlato, University of Catania, Italy  Biodifferentiation And Biosynthesis Of Zinc Oxide Nanoparticles Using Olive Mill Wastewater And Music Sounds Selma Hamimed, University of Carthage, Tunisia  Microwave Assisted Spectrophotometric Determination Of Cefaclor In Pure Form And Pharmaceutical Formulation Amina Mumtaz, PCSIR Labs Complex, Pakistan  12:00 - 12:20  Crossing Of Potato And Biotechnology Partoev Kurbonali, National Academy of Sciences, Tajikistan  Synthesis Of Surface Engineered Zinc Ferrite (ZnFe <sub>2</sub> O <sub>4</sub> ) Nanoparticles By  Coprecipitation Method And Their Characterization Atta Ur Rahman, Jiangsu University of Science and Technology, China  Green synthesis of a novel porous gold-curcumin nanocomposite for efficient alcohol oxidation Sai Prasad Nayak, Sri Sathya Sai Institute of Higher Learning, India  Poster Presentation  Docking And Molecular Dynamics To Predict The Binding Modes Of Flavonoid With Some Kinase Inhibitors Abdelatif Messaoudi, Université Batna, Algeria		•	
Oral Presentations  Investigation On Mechanical Properties Of A Livestock Waste (Valle Del Belice' Sheep Wool) As Reinforcement In Earthen Building Components  Monica Parlato, University of Catania, Italy  Biodifferentiation And Biosynthesis Of Zinc Oxide Nanoparticles Using Olive Mill  Wastewater And Music Sounds Selma Hamimed, University of Carthage, Tunisia  Microwave Assisted Spectrophotometric Determination Of Cefaclor In Pure Form And Pharmaceutical Formulation Amina Mumtaz, PCSIR Labs Complex, Pakistan  12:00 - 12:20 Partoev Kurbonali, National Academy of Sciences, Tajikistan  Synthesis Of Surface Engineered Zinc Ferrite (ZnFe <sub>2</sub> O <sub>4</sub> ) Nanoparticles By Coprecipitation Method And Their Characterization Atta Ur Rahman, Jiangsu University of Science and Technology, China  Green synthesis of a novel porous gold-curcumin nanocomposite for efficient alcohol oxidation Sai Prasad Nayak, Sri Sathya Sai Institute of Higher Learning, India  Poster Presentation  Docking And Molecular Dynamics To Predict The Binding Modes Of Flavonoid With Some Kinase Inhibitors Abdelatif Messaoudi, Université Batna, Algeria	10:00 - 10:30		
Investigation On Mechanical Properties Of A Livestock Waste (Valle Del Belice' Sheep Wool) As Reinforcement In Earthen Building Components Monica Parlato, University of Catania, Italy  Biodifferentiation And Biosynthesis Of Zinc Oxide Nanoparticles Using Olive Mill Wastewater And Music Sounds Selma Hamimed, University of Carthage, Tunisia  Microwave Assisted Spectrophotometric Determination Of Cefaclor In Pure Form And Pharmaceutical Formulation Amina Mumtaz, PCSIR Labs Complex, Pakistan  12:00 - 12:20 Crossing Of Potato And Biotechnology Partoev Kurbonali, National Academy of Sciences, Tajikistan  Synthesis Of Surface Engineered Zinc Ferrite (ZnFe <sub>2</sub> O <sub>4</sub> ) Nanoparticles By Coprecipitation Method And Their Characterization Atta Ur Rahman, Jiangsu University of Science and Technology, China  Green synthesis of a novel porous gold-curcumin nanocomposite for efficient alcohol oxidation Sai Prasad Nayak, Sri Sathya Sai Institute of Higher Learning, India  Poster Presentation  Docking And Molecular Dynamics To Predict The Binding Modes Of Flavonoid With Some Kinase Inhibitors Abdelatif Messaoudi, Université Batna, Algeria	10:30 - 11:00	Superelasticity In Shape Memory Alloys	
Monica Parlato, University of Catania, Italy  Biodifferentiation And Biosynthesis Of Zinc Oxide Nanoparticles Using Olive Mill  Wastewater And Music Sounds Selma Hamimed, University of Carthage, Tunisia  Microwave Assisted Spectrophotometric Determination Of Cefaclor In Pure Form And Pharmaceutical Formulation Amina Mumtaz, PCSIR Labs Complex, Pakistan  12:00 - 12:20  Crossing Of Potato And Biotechnology Partoev Kurbonali, National Academy of Sciences, Tajikistan  Synthesis Of Surface Engineered Zinc Ferrite (ZnFe <sub>2</sub> O <sub>4</sub> ) Nanoparticles By Coprecipitation Method And Their Characterization Atta Ur Rahman, Jiangsu University of Science and Technology, China  Green synthesis of a novel porous gold-curcumin nanocomposite for efficient alcohol oxidation Sai Prasad Nayak, Sri Sathya Sai Institute of Higher Learning, India  Poster Presentation  Docking And Molecular Dynamics To Predict The Binding Modes Of Flavonoid With Some Kinase Inhibitors Abdelatif Messaoudi, Université Batna, Algeria	Oral Presentations		
11:20 - 11:40  Wastewater And Music Sounds Selma Hamimed, University of Carthage, Tunisia  Microwave Assisted Spectrophotometric Determination Of Cefaclor In Pure Form And Pharmaceutical Formulation Amina Mumtaz, PCSIR Labs Complex, Pakistan  12:00 - 12:20  Crossing Of Potato And Biotechnology Partoev Kurbonali, National Academy of Sciences, Tajikistan  Synthesis Of Surface Engineered Zinc Ferrite (ZnFe <sub>2</sub> O <sub>4</sub> ) Nanoparticles By Coprecipitation Method And Their Characterization Atta Ur Rahman, Jiangsu University of Science and Technology, China  Green synthesis of a novel porous gold-curcumin nanocomposite for efficient alcohol oxidation Sai Prasad Nayak, Sri Sathya Sai Institute of Higher Learning, India  Poster Presentation  Docking And Molecular Dynamics To Predict The Binding Modes Of Flavonoid With Some Kinase Inhibitors Abdelatif Messaoudi, Université Batna, Algeria	11:00 - 11:20	Wool) As Reinforcement In Earthen Building Components	
Pharmaceutical Formulation Amina Mumtaz, PCSIR Labs Complex, Pakistan  12:00 - 12:20 Crossing Of Potato And Biotechnology Partoev Kurbonali, National Academy of Sciences, Tajikistan  Synthesis Of Surface Engineered Zinc Ferrite (ZnFe <sub>2</sub> O <sub>4</sub> ) Nanoparticles By Coprecipitation Method And Their Characterization Atta Ur Rahman, Jiangsu University of Science and Technology, China  Green synthesis of a novel porous gold-curcumin nanocomposite for efficient alcohol oxidation Sai Prasad Nayak, Sri Sathya Sai Institute of Higher Learning, India  Poster Presentation  Docking And Molecular Dynamics To Predict The Binding Modes Of Flavonoid With Some Kinase Inhibitors Abdelatif Messaoudi, Université Batna, Algeria	11:20 - 11:40	Wastewater And Music Sounds	
Partoev Kurbonali, National Academy of Sciences, Tajikistan  Synthesis Of Surface Engineered Zinc Ferrite (ZnFe <sub>2</sub> O <sub>4</sub> ) Nanoparticles By  Coprecipitation Method And Their Characterization  Atta Ur Rahman, Jiangsu University of Science and Technology, China  Green synthesis of a novel porous gold-curcumin nanocomposite for efficient alcohol oxidation  Sai Prasad Nayak, Sri Sathya Sai Institute of Higher Learning, India  Poster Presentation  Docking And Molecular Dynamics To Predict The Binding Modes Of Flavonoid With Some Kinase Inhibitors  Abdelatif Messaoudi, Université Batna, Algeria	11:40 - 12:00	Pharmaceutical Formulation	
12:20 - 12:40  Coprecipitation Method And Their Characterization Atta Ur Rahman, Jiangsu University of Science and Technology, China Green synthesis of a novel porous gold-curcumin nanocomposite for efficient alcohol oxidation Sai Prasad Nayak, Sri Sathya Sai Institute of Higher Learning, India  Poster Presentation  Docking And Molecular Dynamics To Predict The Binding Modes Of Flavonoid With Some Kinase Inhibitors Abdelatif Messaoudi, Université Batna, Algeria	12:00 - 12:20		
12:40 - 13:00 oxidation Sai Prasad Nayak, Sri Sathya Sai Institute of Higher Learning, India  Poster Presentation  Docking And Molecular Dynamics To Predict The Binding Modes Of Flavonoid With Some Kinase Inhibitors Abdelatif Messaoudi, Université Batna, Algeria	12:20 - 12:40	Coprecipitation Method And Their Characterization	
Docking And Molecular Dynamics To Predict The Binding Modes Of Flavonoid With  13:00 - 13:15 Some Kinase Inhibitors  Abdelatif Messaoudi, Université Batna, Algeria	12:40 - 13:00	oxidation	
13:00 - 13:15 Some Kinase Inhibitors Abdelatif Messaoudi, Université Batna, Algeria		Poster Presenatation	
	13:00 - 13:15	Some Kinase Inhibitors
